PERSONAL PROFILE

Full-stack Software Engineer with nearly two years of professional experience in .NET development and expertise in modern JavaScript technologies. Proficient in designing and building scalable web applications, APIs and platforms across diverse domains. Skilled in C#, .NET Web API, Blazor, React, TypeScript, Node.js and SQL/NoSQL databases. Adept at collaborating in hybrid and remote Agile teams, solving complex technical challenges, and delivering user-centric solutions with a focus on maintainability and scalability.

EDUCATION

Master in High-Tech Entrepreneurship

September 2025 – July 2026

HarbourSpace@UTCC

BSc (Hons) Computer Science (Top-up, Online)

September 2024 – September 2025

University of Hertfordshire, UK

Skill

- Programming languages & Frameworks: C#, .NET Web API, Blazor, JavaScript, TypeScript, React, Node.js, Express.js, Nest.js, Python, Go (basic), Prisma ORM
- Database: SQL Server, PostgreSQL, MongoDB
- Software Development: Full-stack development, RESTful API, scalable architecture, CI/CD (GitHub Actions)
- Patterns & Practices: Monolithic, Microservices (academic projects), Agile methodology
- Tool & Platforms: Git, Docker (basic), AWS, Vercel
- Soft Skills: Cross-team collaboration, problem solving, effective communication, adaptability

PROFESSIONAL EXPERIENCE

.NET Software Developer

2023 - Present

YammoBots, Remote

- Designed, developed, and maintained web-based applications using C#, ASP.NET Core, and Blazor, ensuring robust and scalable solutions.
- Implemented Repository and Unit of Work patterns to enhance code maintain ability and scalability.
- Collaborated with product owners and developers in Agile/Scrum teams to deliver high-quality, client-facing solutions.
- Contributed technical documentation and troubleshooting, ensuring seamless project handovers.

Personal Projects

Nomad Productivity Dashboard

[Frontend](#) • [Backend \(ExpressJS / NestJS\)](#) • [Notification Service \(Go\)](#)

- Built an all-in-one productivity dashboard tailored for digital nomads, integrating task, finance, and scheduling features.
- Currently migrating from ExpressJS to NestJS.
- Implemented a Kanban Board with React, TypeScript, and Material UI for task management and workflow visualization.
- Designed and developed a To-Do Task module supporting infinite scroll and Kanban Board DTOs for efficient data handling.
- Create an Expense Tracker to log daily spending and generate monthly budget summaries.
- Implemented an .ics file generator to manage and export visa expiry dates to calendar applications.
- Engineered a real-time push notification system using Go and WebSocket to deliver instant updates
