SUMMARY

A Full-stack developer with 3+ years of hands-on experiences across CRM, healthcare and social apps. I learn fast, adapt quickly, and always look for better way to get things done. Comfortable owning features end to end from backend APIs and database design through to frontend flows, integrations, and production support. Based in Bangkok, Thailand and immediately available.

EXPERIENCE

Full-Stack Developer — Yammobots

Sep 2023 - Present

- Developed and delivered Enterprise Level backend systems for CRM systems, Clinic Management systems and Cinema Management systems using C# .NET API integrated with Azure App Service and Azure Blob Storage.
- Played a key role in upgrading the legacy ASP.NET MVC codebases into modern React Frontend and C# Web API architecture — improving system scalability, maintainability and reducing tight coupling.
- Implemented optimistic concurrency control with row versioning to prevent data conflicts during payment transactions for a high-volume pre-order system.
- Participated in Requirement reviews, Unit Testing, Code Review and Architecture Decisions.
- Introduced CI/CD pipelines for staging and production deployments to replace manual processes and improving deployment consistency, speed and reliability.
- Collaborated closely with cross-functional teams (designers, mobile developers, and product managers) to deliver scalable and maintainable solutions.

Lead Developer — CoLive, Roommate Finder App

Aug 2025 - Present

- Designed and built CoLive from scratch - took full ownership from user workflow, database schema designs, project structures, and codebase implementation through to cloud deployment.
- Designed the user onboarding and matching workflow - mapping out the full experience before coding.
- Created the database schema to support graph-based roommated matching and real-time queries.
- Developed real-time chat messaging features and secure user authentication using O Auth 2.0 for smooth user experience
- Deployed and configured cloud infrastructure for Web App, Mobile App and API - handling the full production environment.

PERSONAL PROJECTS

Clinic Appointment Booking API

Tech Stack: C# .NET Core 10, Neon PostgreSQL, Redis, Docker, GitHub Actions, GCP Cloud Run

GitHub: <https://github.com/Kyawpaingoo/medibook>

Demo: <https://github.com/Kyawpaingoo/medibook>

- Developed optimistic concurrency control with EF core row-versioning to prevent double-booking in high-volume booking time.
- Designed a slot state (Available, Reserved, Confirmed and Cancelled) to manage appointment lifecycle with clear transactions and audit.
- Implemented Redis cache for real-time slot availability for every booking and cancellation to maintain data consistency.
- Deployed to GCP Cloud Run from GitHub Actions CI/CD with a multi-stage Dockerfile.

EDUCATION

Master in High-tech Entrepreneurship, Harbour.Space Bangkok, Thailand	2025-2026
BSc (Hons) Computer Science, University of Hertfordshire (Online) with First Class United Kingdom	2024-2025
NCC Level-5 Diploma in Computing with Business Management, Strategy First College Yangon, Myanmar	2022 - 2023

SKILLS

Backend:	C# .NET, Node.js, Express.js, Nest.js, Python, Fast API
Frontend:	React, Next.js, TypeScript, Tailwind CSS, Shadcn, Blazor
Mobile:	React Native, Expo, NativeWind
Database:	PostgreSQL, Microsoft SQL Server, MongoDB, Prisma, Redis, pgGraph, AWS Dynamo DB
Cloud:	AWS EC2, AWS ECS, AWS S3, GCP Cloud Run, Cloudflare Workers, Azure App Service, Azure Blob Storage
DevOps:	Git, Docker, GitHub Action, Gitlab CI/CD
Language:	English (Professional), Burmese (Native)
